

RFQ # 42023-32 Retention Pond Repairs

Bidder Questions and Responses:

Posted and Distributed 3.13.2023

Question 1

".....reviewing the plans and I have a question It's calling for stone to be on the side of phase 3 asphalt paving but that's not in this bid. I'm concerned why they are doing that before the asphalt?"

Answer 1

Although the plans show a future driveway between the building and pond location, this driveway and work to be performed for the installation of the driveway is not a part of this RFQ and will be a part of a future project anticipated fall 2023. Please note that the inlet, pipe and outlet that are noted for installation below the future drive are included in this RFQ to ensure, upon completion of the pond repairs and modifications, no further disruption to the pond will be necessary for future projects.
